

CORAL BANKS CONSTRUCTION COMPANY™

THE EXPERIENCE

Turtle Island is the habitat to an expansive and beautiful coral reef which was discovered a mere ten years ago. Within this decade, tourists have flocked to Turtle Island to swim in the reef and observe the fascinating wildlife that inhabits the underwater world. The increasing popularity of the previously untouched island and its surrounding waters is creating an environmental concern. Zoologists and marine biologists are quickly observing the rapid decay of the finely balanced ecosystem.

The concerned citizens of the islands have called in the long standing and highly reputable "Coral Banks Construction Company" to assist them with maintaining the tourist industry while preserving the beauty of Turtle Island. The company's main focus is to build environmentally friendly bridges that allow people to witness the beauty of nature without destroying it in the process. Coral Banks Construction Company has developed a plan for a large bridge to Turtle Island which will keep the reef safe from pollution and the wildlife free from danger while allowing people to enjoy the coral reef.

THE DETAILS

Overview

Coral Banks is an engaging, two hour experience that provides participants with a hands-on lesson in effective teamwork. Participants must operate together as a single organization, as individual teams, and in sub-groups, to complete the construction of an enormous model bridge. They will recognize the power of collaboration, understand the impact of both team process and spirit, and realize the importance of sharing resources and knowledge to accomplish goals and achieve great results.

Key Learning Points

- Optimize team talent
- Understand the power of excellent leadership
- Realize the importance of effective communication
- Experience the impact of appropriate resource utilization
- Learn how unanimous focus on a single task leads to success

Practical Details

- Two hour session
- Groups of 20 and up
- Ideal for use in a conference setting

RESULTS

- *Improve team effectiveness*
- *Decrease frustration and rework*
- *Create greater alignment between individual goals and the end result*
- *Increase productivity*
- *Achieve success to increase motivation and job satisfaction*
